The Story Behind the Creation of Vibrational Alchemy

In 2003 in the midst of an enormous awakening and descent of spirit, Lumenaria was having severe symptoms that mimicked radiation sickness – shaking, hair-loss, nausea, difficulty sleeping. If she got her crown chakra wet, she would shake even more severely for almost two hours. Her guides had told her that she was literally having difficulty processing the light running through her system – radiation sickness from the sheer amount of Divine light she was opening to.

During a healing session with her friend and colleague, Bret Mosher ([Mosher Health](#), San Diego, CA), Lumenaria's guides told her she needed Iridium. She had never heard of this before and did not know what it was. When she told Brett what she had heard, he was surprised and excited. He knew that it was an element/mineral theorized to account for the cancer cures in the Gerson carrot juices studies (the soil was particularly rich in Iridium). However, at the time he did not know if anyone was taking it internally or what would happen if they did. From what he knew of Iridium, he felt it would likely be helpful in what Lumenaria was experiencing.

Lumenaria's guides persisted in giving her more and more information that began to make it clear that this was exactly what she needed, although she could not find anything that indicated people were taking Iridium internally. So with deep trust, Lumenaria proceeded in finding out how she could purchase a finely powdered form of Iridium and worked with Bret to develop what they thought would be a good 'delivery' method. Then, she and Brett lifted a cup of the first concoction and said jokingly, "whatever happens to you happens to me." Within seconds of taking the mixture, Lumenaria began to have relief from the symptoms. Within several days, her hair loss stopped and she was humming and harmonizing with ease in her new vibrational state.

Since this time in 2003, Lumenaria has refined the formula and done more extensive research on the use of iridium internally. She now knows that it is a safe and effective means of supporting the body's nervous system in conducting more light energy and is thrilled to offer this unique and amazing product, Vibrational Alchemy.
